Nanjing Shuguang Chemical Group Co.,Ltd.

Titanate SG-Ti 502

Chemical Name: Lactid acid chelated titanate

CAS No.: 65104-06-5

Product appearance: A clear to slightly hazy, colorless to light yellowish aqueous liquid

Application:

It can be used as catalyst for esterification and transesterification. It can improve crosslinking performance for water borne paints and polymers, adhesives, forming excellent gel protecting layer. It can make paint forming hard and gloss surface on glass, metal, filler, pigment, and improve adhesion and dispersion for pigments.

Packing: Packed with 5L、 20L、 210L plastic/steel drum or 1000L IBC container, also can be packed according to customer's requirement.

Storage: Seal and store it in a cool, dry and ventilated place, keep moisture-proof and waterproof, far away from kindling material and heat source.
