Silane coupling agent Rsi-S

Chemical Name: Bis-(γ -triethoxysilylpropyl)-tetrasulfide in silica carrier

CAS No.: N.A.

Product appearance: White powder

Application:

RSi-S is blend of KH-845-4 and silica, it has the same function with KH-845-4, but it's white solid and more convenient for processing, especially for light color system.

1. It is a successful multi-purpose silane coupling agent which is used in rubber and plastic industry. By its application, the rubber's physical and mechanical properties can be improved, tensile strength, anti-peel strength, wear-resisting ,etc., can be significantly improved, the permanent deformation can be reduced. Meanwhile it may reduce the material viscosity and enhance workability.
2. It is specially suitable for the vulcanized rubber system which uses silica, silicate and so on as reinforcing additive. Suitable fillers include silica, talc powder, clay, mica powder, pottery clay and so on, and suitable polymers include NR, IR, SBR, BR, NBR, EPDM etc.

Packing: Packed with 25kg PE bag, 40L PE drum or 500kg woven bag, also can be packed according to customer's requirement.

Storage: Seal and store it in a cool, dry and ventilated place, keep moisture-proof and waterproof, far away from kindling material and heat source.
